

April 26, 2018

Our family bought a puppy from The Family Puppy. Having known their reputation from friends, we were confident we would get a superior dog. We had decided to get a Miniature Schnauzer and we hoped we could find an all black one rather than the usual salt and pepper variety. They had just the dog we wanted, a little black Schnauzer, with whom our kids immediately fell in love. He was playful with a sweet temperament. His black coat was beautiful and we bought him and received a warranty and complimentary vet visit. I remember the excitement we felt when we brought him home, only 8 weeks old and 6 pounds.

Our daughter named him Sir Mischievous AJ Wright of Irvine but we called him Mischief for short. He was an amazing dog. Everyone that met him loved him. He was a dog lovers dream. Mischief was smart, playful, and loving. He would cuddle and show affection. He was easily housebroken and we always crated him at night. Mischief loved his sleep so we never had to worry about getting up too early or in the middle of the night. He was a great traveler and loved to play fetch. His coordination with leaping and catching tennis balls and Frisbees was incredible. Mischief was a healthy dog and grew to be 22 pounds. The veterinarian told us that his black coat would turn salt and pepper but it never did. Mischief was a handsome dog his entire life with a beautiful black coat with just a few gray hairs on his beard and chest.

We were heartbroken to lose our sweet Mischief this past year. He lived 14 ½ years. This faithful friend immensely blessed our family. We would go back and do it all over again. Mischief was a treasure and we appreciate The Family Puppy for providing high quality pets from reputable breeders who join families like ours. We couldn't have asked for a better dog!!! Of course we are biased to say it but Mischief was the best dog ever!

The Family Puppy and other reputable pet stores are a great resource in our communities. We hope you will support HB 5916 and 5917, raising the bar on pet stores and breeders and ensuring they can continue to be the valuable resources we have found them to be for ours and many other families.
